Decision
Select Decision Logic
Select the method that the automation uses to determine which decision outcome to run.
Manually Set Conditions
Define logic to evaluate explicitly defined data from your automation and determine which outcome runs.
Let AI Determine Conditions
Write instructions for AI to dynamically evaluate data from your automation and determine which outcome runs.
You don't have access to Decision AI because you don't have the necessary license. Contact your Salesforce account executive for help.
Outcomes
For each path the automation can take, create an outcome. For each outcome, specify the conditions that must be met for the automation to take that path.
